

within themselves this strange entity which I have called my “other self,” and that the discovery will lead them, as it has led me, into a closer relationship with that source of power which surmounts obstacles and masters difficulties, instead of being mastered by them. There is a great power to be discovered in your “other self”! Search sincerely and you will find it.

Hill’s work was published during the Great Depression and indeed helped millions of people find hope and courage to live in faith that they would find their own paths to success. I believe we can find many parallels between his time and our own. It is during periods of great stress that we find our will and our inner strength. With the current economic uncertainties, people are choosing—or being forced—to find new paths to provide for themselves and their families, and many will find great success. They will be the great stories of success we will be reading about a few years from now. Will you be among those success stories or still watching from the sidelines?

“Failure”: A Blessing in Disguise

I have made another discovery as the result of this introduction to my “other self,” namely, that there is a solution for every legitimate problem, no matter how difficult the problem may seem.
